

## **Environmental**

Azure and its Brands; Brooklyn Contract, Connection & Hitch Mylius USA, directs its journey toward sustainability by using a three pillar approach that seeks economic vibrancy, environmental honesty, and social responsibility. We are committed to exceeding compliance with environmental laws and regulations that affect our operations through continuous improvement and the most sustainable practices possible. Azure's energy policy encourages the minimization of carbon footprint through the implementation of energy conservation and efficiency improvements. Our goal is to reduce impacts to human and ecosystem health through data collection on our processes, evaluation, and adjustment of our processes and facilities. Azure commits to openly communicating its environmental policy to help inform stakeholders about its environmental values.
